NAHAL ROSHANRAVAN

Frontend developer

ABOUT

I'm Nahal Roshanravan, I was born in Irar. I studied physics during my bachelor's and master's degrees and I have been teaching as an assistant professor at the university in this field for several years, but my passion led me to programming and development. I've learned programming through various courses and with different instructors. Due to my enthusiasm for coding, I'm eager to immerse myself in diverse educational experiences, progress in this field, and find joy in coding as my profession. I believe I possess **strongteamwork skills in JavaScript development**, **deliveringeffective solutions and implementing best practices**. My enthusiasm for collaborative work with a customer-centric approach makes me an ideal candidate for employment. Despite being junior in this domain, I'm confident that I will soon become one of the world's top developers. If you believe I'm a suitable candidate for this profession, we can stay in touch through this Gmail. Stay with me on this journey.
